

Define these matters when you ask for inquiry for curtain tracks

In the case of horizontal curtain track

- manual or motorized use
- if manual, so
 - walk along
 - rope driven
 - possibly crank driven?
- if motorized, then
 - speed of the curtain (e.g. 0,4 m/s or 10 s to open or something else important to you)
 - possible demands concerning
 - drive system
 - masking
 - something else important to you
- minimum permitted load for each carriage / slide (determines much the life time before problems appear), e.g. 10 kg/carriage
- minimum overlap in the center line (when bi-parting curtains)
- amount of curtain
- main measures of curtains
- fabric:
 - velvet, Molton type cotton or something else
 - minimum weight of fabric e.g. 300 g/m²
 - fireproof or not?
 - color
